

Ethan Tran

Ellicott City, MD | (410) 762-9893 | etmbox@gmail.com | US Citizen | <https://ettran777.github.io/portfolio>

EDUCATION

University of Maryland, College Park
Bachelor of Science in Information Science (B.S.)

College Park, MD
Graduated May 2026

EXPERIENCE

Full Stack Developer - Interclipse
Sofiac Travel

Oct. 2026 – Present
Annapolis Junction, MD

- Resolved stakeholder-reported issues across React frontend validation and backend services. Merged two tickets in first week.
- Utilized Agile and SCRUM workflows to stay aligned with the team across sprints, Tracked and worked tickets in Jira.

UI/UX Consultant - LabX, National Academy of Sciences
UMD iConsultancy

Sept. 2025 – May 2026
College Park, MD

- Served as lead UI/UX analyst for LabX, partnering with stakeholders to identify usability issues and deliver data-driven design recommendations, informed by Google Analytics traffic, bounce rate, and engagement metrics
- Conducted comprehensive QA and accessibility audits (WCAG 2.1, semantic HTML) and presented a formal Clarity & Usability Assessment report to National Academy of Sciences program leadership

Freelance Front-End Developer
Sushi King

May 2026 – Present
Remote

- Partnered directly with restaurant owners to redesign and develop a production website, transforming the brand into a premium digital experience with responsive, mobile-optimized, WCAG-compliant interfaces
- Built a lightweight JSON-driven content system enabling non-technical staff to update site content without touching application code

PROJECTS

Pokélect - Cloud-Native Card Collection App | *Azure, React, JavaScript*

Azure WebApp

- Co-developed a cloud-native card collection platform using React, Azure Function Apps, and Cosmos DB
- Implemented REST API, authentication, messaging, privacy controls, and collection management using a scalable NoSQL architecture
- Applied secure development practices including input validation and privacy-first data handling across the authentication and messaging systems

Tidemark – Aquarium Tracker | *React, TypeScript, Tailwind CSS, Recharts*

Github Pages

- Designed and developed a comprehensive aquarium management platform supporting multi-tank planning, livestock tracking, maintenance scheduling, journaling, analytics, and JSON backup/import workflows
- Engineered rule-based systems that automatically compute compatible water parameter ranges, detect livestock compatibility conflicts, evaluate predation risk, and generate dependency-aware setup workflows
- Built reusable React components and extensible TypeScript data models powering customizable tracking fields, automatic chart generation, recurring maintenance scheduling, and intelligent application state management

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Java, C#, Python, SQL, HTML/CSS, C, Assembly, R

Frameworks & Libraries: React, Tailwind CSS, Node.js, Express.js, Recharts, MERN

Cloud & Databases: Microsoft Azure, Azure Functions, Cosmos DB, SQL, NoSQL, Relational Database Design, MongoDB

Web Technologies: REST APIs, OAuth, Authentication, Responsive Design, Semantic HTML, WCAG 2.1 Accessibility, SEO, MongoDB Compass

Additional: Data Structures, Algorithms, Object-Oriented Programming, TCP/IP Networking, Secure Software Development, Data Analysis
