EDUCATION

University of Maryland, College Park
Bachelor of Science, Information Science

Sep 2022 - May 2026
College Park, MD

EXPERIENCE

LabX, National Academy of Sciences
UI/UX Consultant

Sep 2025 - May 2026
College Park, MD

- Served as lead UI/UX analyst for LabX, partnering with stakeholders to identify usability issues and deliver data-driven design recommendations, informed by Google Analytics traffic, bounce rate, and engagement metrics
- Conducted comprehensive QA and accessibility audits (WCAG 2.1, semantic HTML) and presented a formal Clarity & Usability Assessment report to National Academy of Sciences program leadership

Sushi King

May 2026 - Present

Freelance Front-End Developer

Remote

- Partnered directly with restaurant owners to redesign and develop a production website, transforming the brand into a premium digital experience with responsive, mobile-first, WCAG-compliant interfaces
- Built a lightweight JSON-driven content system enabling non-technical staff to update site content without touching application code

PROJECTS

Pokéllect - Cloud-Native Card Collection App

Sep 2025 - May 2026

<https://mango-meadow-07a2e9f10.7.azurestaticapps.net/home>

University of Maryland, College Park

- Co-developed a cloud-native card collection platform using React, Azure Function Apps, and Cosmos DB
- Implemented REST API, authentication, messaging, privacy controls, and collection management using a scalable NoSQL architecture

Tidemark – Aquarium Tracker ettran777.github.io/aquariumTool

May 2026 - Present

- Designed and developed a comprehensive aquarium management platform supporting multi-tank planning, livestock tracking, maintenance scheduling, journaling, analytics, and JSON backup/import workflows
- Modeled livestock/equipment setup requirements as a dependency graph with traversal-based validation to gate build steps and detect compatibility/predation conflicts in real time
- Built reusable React components and extensible TypeScript data models powering customizable tracking fields, automatic chart generation, recurring maintenance scheduling, and intelligent application state management

Debt and Taxes <https://ettran777.itch.io/debt-and-taxes>

Apr 2025 - Present

- Co-developed a Unity idle/clicker game for GameDev.JS game jam featuring desktop-style applications, progression systems, and event-driven gameplay mechanics, outperforming over 100 submissions
- Implemented core gameplay systems, UI, audio integration, and game-state logic. Released on Itch.io and currently expanding for Steam release

Job Junction - Job Aggregation Platform | INST377 Final Project, University of Maryland

Jan 2025 - May 2025

- Co-developed a full-stack job aggregation platform, independently building the majority of the front end and owning the account/authentication system
- Integrated the Adzuna API to fetch and normalize job listings, implementing fuzzy matching via Elasticsearch to rank results against user-defined filters
- Built backend persistence for user accounts, sorting/filtering logic, and cross-session job bookmarking

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Java, C#, Python, SQL, HTML/CSS, C, Assembly, R

Frameworks & Libraries: React, Tailwind CSS, Node.js, Express.js, Recharts, MERN

Cloud & Databases: Microsoft Azure, Azure Functions, Cosmos DB, SQL, NoSQL, Relational Database Design

Web Technologies: REST APIs, OAuth, Authentication, Responsive Design, Semantic HTML, WCAG 2.1 Accessibility, SEO

Data Structures & Algorithms: Arrays, Hash Maps, Linked Lists, Stacks, Queues, Heaps, Trees, Graphs, BFS/DFS Traversal, Sorting Algorithms, In-Place/Stable Analysis, Time & Space Complexity (Big-O)

Additional: Object-Oriented Programming, TCP/IP Networking, Secure Software Development, Data Analysis
