Ellicott City, MD | (410) 762-9893 | etran124@terpmail.umd.edu | US Citizen | <https://ettran777.github.io/portfolio>

EDUCATION

University of Maryland, College Park

Bachelor of Science in Information Science

College Park, MD

Aug. 2022- May 2026

EXPERIENCE

UI/UX Consultant - LabX, National Academy of Sciences

Sept. 2025 – May 2026

UMD iConsultancy

College Park, MD

- Served as lead UI/UX analyst for LabX, partnering directly with stakeholders to identify usability issues and deliver data-driven design recommendations
- Analyzed Google Analytics metrics including traffic sources, bounce rates, and engagement data to diagnose user retention challenges and prioritize interface improvements
- Conducted comprehensive QA and accessibility audits, applying WCAG 2.1 standards and semantic HTML best practices to improve platform accessibility and usability
- Redesigned information architecture and navigation flows to better align user journeys with organizational goals and increase visibility of core interactive programs
- Created high-fidelity prototypes, user-flow diagrams, and a formal Clarity & Usability Assessment report presented to National Academy of Sciences program leadership

PROJECTS

Pokélect - Cloud-Native Card Collection App | *Azure, React, JavaScript*

Sept. 2025 – May 2026

- Co-developed a cloud-native card collection platform using React, Azure Function Apps, and Cosmos DB
- Implemented REST API, authentication, messaging, privacy controls, and collection management using a scalable NoSQL architecture

Debt and Taxes | *C#, Git, Unity*

Apr. 2025 – Present

- Co-developed a Unity idle/clicker game for GameDev.JS game jam featuring desktop-style applications, progression systems, and event-driven gameplay mechanics
- Implemented core gameplay systems, UI, audio integration, and game-state logic. Released on Itch.io and currently expanding for Steam release

UMD Campus Pantry Website Redesign | *HTML, CSS, JavaScript*

Sept. 2025 – Dec. 2025

- Redesigned and developed a mobile-friendly web application using HTML, CSS, and JavaScript based on user research findings
- Made data-driven UI/UX improvements from user research collected by our INST362 project team
- Deployed via GitHub Pages

Job Junction - Job Aggregation Platform | *HTML, CSS, JavaScript*

Mar. 2025 – May. 2025

- Developed a job aggregation platform using Adzuna's REST API and Supabase, supporting search, filtering, bookmarking, and user authentication
- Implemented fuzzy matching, reCAPTCHA-secured registration, and scalable cloud-backed user management

Electric Vehicle Database System | *SQL*

Dec. 2024

- Designed and implemented a normalized relational database with 9 tables using VIN-based relationships
- Created SQL queries and views to analyze a 200,000+ record public EV registration dataset

TECHNICAL SKILLS

Languages: Java, C#, Python, JavaScript, SQL, HTML/CSS, C, Assembly, R

Frameworks & Libraries: React, Node.js, Express.js, MERN

Cloud & Databases: Microsoft Azure, Azure Functions, Cosmos DB, SQL, NoSQL, Relational Database Design, Query Optimization

Web Technologies: RESTful APIs, OAuth, Authentication, Semantic HTML, WCAG 2.1 Accessibility Standards

Developer Tools: Git, Unity, Visual Studio, VS Code, RStudio

Additional: TCP/IP Networking, Secure Development Practices, Data Analysis
